

# **Model Number**

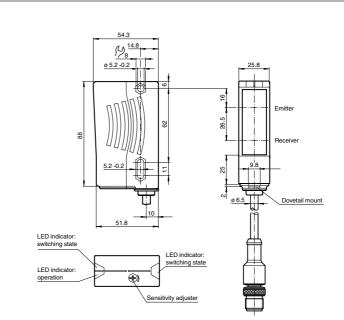

### RL28-8-H-2000-IR-3019/47/115b

Background suppression sensor with 0.2 m fixed cable and 4-pin, M12 connector

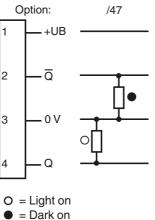

### Features

- Ultra bright LEDs for power on and switching state
- Minimal black/white difference through the infrared transmission LED
- Not sensitive to ambient light, even with switched energy saving lamps
- Waterproof, protection degree IP67
- Protection class II

Dimensions

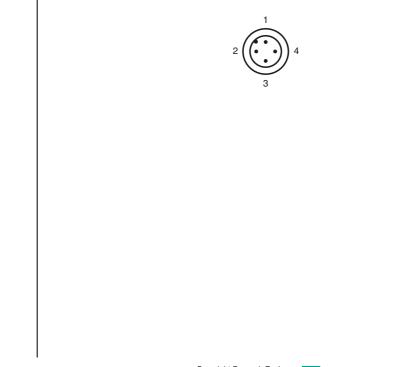

# **Electrical connection**

= Dark on

# RL28-8-H-2000-IR-3019/47/115b

Technical data		Accessories
General specifications		OMH-05
Detection range	20 2000 mm	Mounting aid for round steel ø 12 mm or
Detection range min.	20 200 mm	sheet 1.5 mm 3 mm
Detection range max.	20 2000 mm	sneet 1.5 mm 3 mm
Background suppression	max. + 10 % of the upper limit of the detection range	ОМН-07
Light source	IRED	Mounting aid for round steel ø 12 mm or
Light type	modulated infrared light, 880 nm	sheet 1.5 mm 3 mm
Black/White difference (6 %/90 %)	< 40 %	Sheet 1.5 min 5 min
Diameter of the light spot	approx. 70 mm at a distance of 2000 mm	OMH-21
Angle of divergence	transmitter 2° receiver 2°	Mounting bracket
Ambient light limit	50000 Lux	ОМН-22
-	30000 Eux	_
Functional safety related parameters	1130 a	Mounting bracket
MTTF <sub>d</sub>		OMH-MLV11-K
Mission Time (T <sub>M</sub> )	20 a	dove tail mounting clamp
Diagnostic Coverage (DC)	0 %	
Indicators/operating means		OMH-RLK29
Operating display	LED green	Mounting bracket
Function display	2 LEDs yellow ON: object inside the scanning range OFF: object outside the scanning range	OMH-RLK29-HW
Controls	Detection range adjuster	Mounting bracket for rear wall mounting
Electrical specifications		OMH-RL28-C
Operating voltage U <sub>B</sub>	10 30 V DC	Protective cover
Ripple	10 %	
No-load supply current	≤ 40 mA	Other suitable accessories can be found at
Output		www.pepperl-fuchs.com
Switching type	light/dark on	
Signal output	2 PNP, complementary, short-circuit protected, reverse polarity protected , open collectors	
Switching voltage	max. 30 V DC	
Switching current	max. 200 mA	
Switching frequency f	250 Hz	
Response time	2 ms	
Ambient conditions		
Ambient temperature	-40 60 °C (-40 140 °F)	
Storage temperature	-40 75 °C (-40 167 °F)	
Mechanical specifications		
Protection degree	IP67	
Connection	0.2 m fixed cable with 4-pin, M12 connector	
Material		
Housing	Plastic ABS	
Optical face	plastic	
Mass	70 g	
Compliance with standards and direct ves	-	
Standard conformity		
Product standard	EN 60947-5-2:2007	
Approvals and certificates		
Protection class	II, rated voltage ≤ 250 V AC with pollution degree 1-2 accor- ding to IEC 60664-1	

UL approval CCC approval cULus Products with a maximum operating voltage of ≤36 V do not bear a CCC marking because they do not require approval.

### **Curves/Diagrams**

# Additional information

### Intended use:

The transmitter and receiver are located in the same housing for direct detection sensors with background masking. Marking of objects outside the detection range is achieved by arranging the angle between the transmitter and receiver (2 receiver elements).

Objects are detected independently of their surface structures, brightness and colour, as well as the brightness of the background.

### Mounting instructions:

The sensors can be fastened directly with fixing screws or with a support bracket (not included with delivery).

The surface underneath must be flat to prevent the housing from moving when it is tightened into position. We recommend securing the nut and screw in place with spring washers to prevent the sensor from going out of adjustment.

### Adjustment:

After the operating voltage is applied, the LED is lit green.

Align the sensor to the background. If the yellow LED is lit, the detection range should be reduced with the detection range adjuster until the yellow LED goes out.

### **Object direction:**

Place the object to be detected at the desired maximum detection range and align the light spot to it. If the object is detected, the yellow LED lights up.

If it does not light up, the detection range must be adjusted on the potentiometer until it lights up when an object is detected.

# **Cleaning:**

We recommend cleaning the optical surface and checking the screwed connection and other connections at regular intervals.
